Subject: Meeting with Stan van de Wetering

I saw Stan at the Sediment Symposium. Stan is the Aquatics Resource Manager for the Confederated Tribes of the Siletz. He indicated that he would like to get together with EPA to discuss his further activities in the Mid-Coast TMDL development process. He is intending to run heat source on a piece of the Tribal lands but we want to get a sense on how things are going with the NCC litigation. He does want to help the process but doesn't want to get too far out in front if we anticipate a change in the standards direction. He suggested meeting in Portland probably at the OOO and he gave me the following dates: 2/7, 2/13, 2/14, and 2/15.

I do think it would be good for us to meet with Stan. He is a member of the Mid-Coast TWGs and is concerned about sediment and temperature water quality issues in the source water supply for the Siletz public water system. The system has had to shut down a number of times because of high turbidity in the source water.

Please let me know if you are interested in meeting with Stan, and let me know which dates work for you.

Give me a call if you have any questions.

Alan
